

AIRTECT

Plastic Leak Alarm System

The solution....

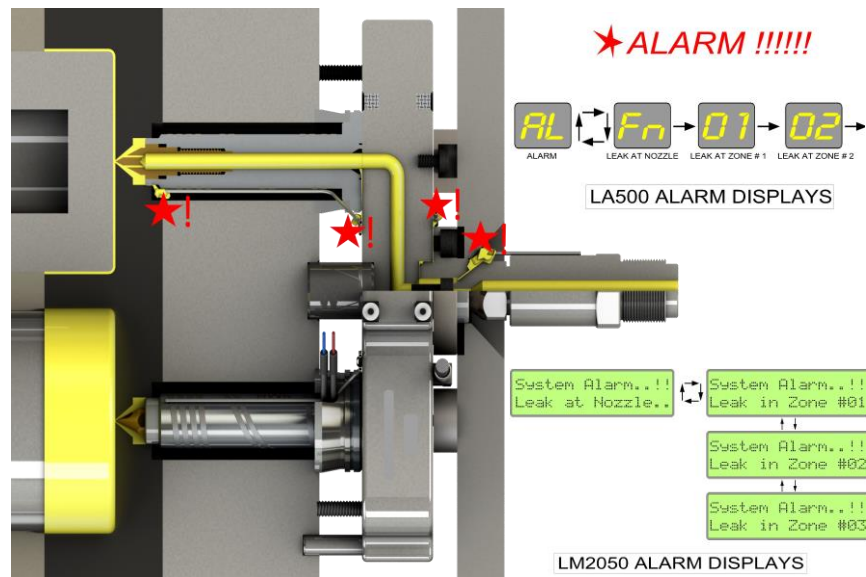

...to these problems

Modular and Fixed Leak Detection Systems

- Nozzle, Barrel and Hot Runner Mold Protection up to 32 Zones
- Direct Plastic Leak Presence Detection
- Robust 2mm Stainless Steel Sensor Tubes
- Mould Temperature Monitoring
- Programmable Machine Interlocks
- Fast Payback
- 24/7 Peace of Mind
- Easy Installation

AIRTECT

Plastic Leak Alarm System

Turn To The Industry Experts

Why Airtect?

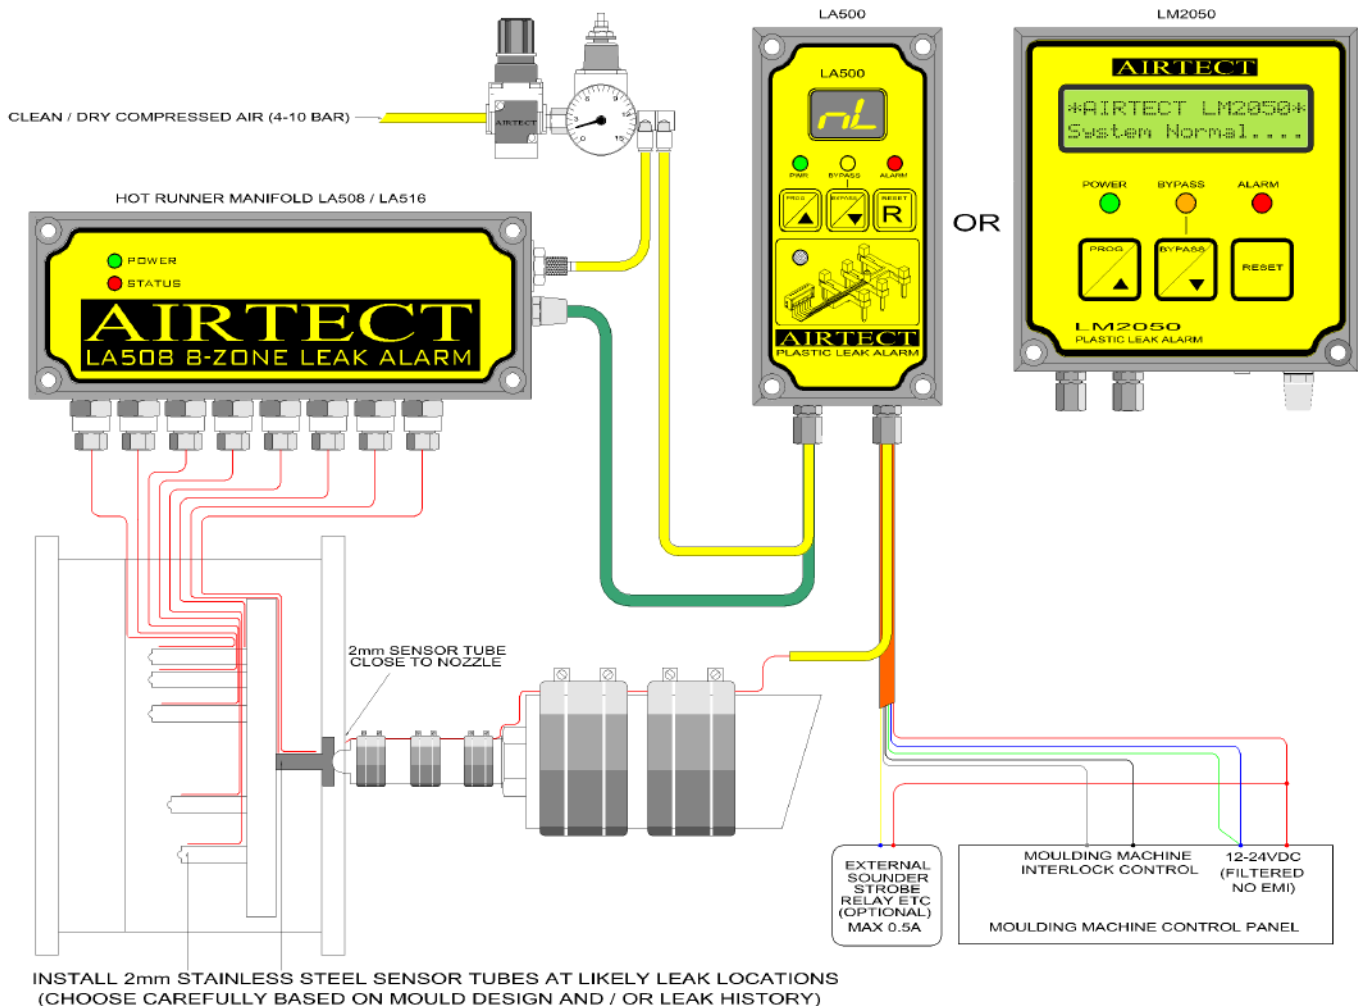

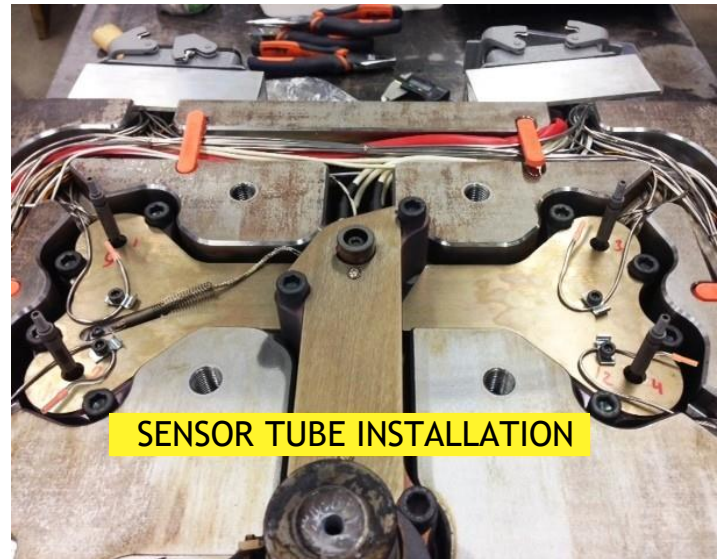

The Airtect Plastic Leak Alarm System is a unique device which gives protection against plastic leak damage, either within a Hot Runner Mould or at the machine Injection Nozzle.

Sensor Tubes easily locate within existing wiring channels.

Leak location/s is displayed on LED or LCD Clear Text Display.

It also protects against running molds that are under/over temperature.

It gives less downtime and greatly reduced repair costs.

INSTALL 2mm STAINLESS STEEL SENSOR TUBES AT LIKELY LEAK LOCATIONS
(CHOOSE CAREFULLY BASED ON MOULD DESIGN AND / OR LEAK HISTORY)

AIRTECT LA500 / LM2050 NOZZLE AND HOT RUNNER MOULD PROTECTION

'don't leave a mold without it'
