

New!
Second Generation

NanoMoldCoating™ HC & HCF

ELIMINATING STICKING PROBLEMS

- HCF formula is FDA Certified
- Enhanced release properties
- Longer lasting and more durable than the original formula
- HC & HCF formulations can be re-applied over itself for even greater durability and longevity
- In-house/self applied application
- Improved shelf life and less moisture sensitive
- All natural citrus based remover
- Up to 300,000 cycles per coating
- Reduces cycle times, increases productivity & eliminates sticking
- Improves part quality
- Improves part finish by eliminated dragging and stretching
- Reduces molding pressure and temperature
- Withstands temperatures up to 1000°F
- Can be used for virtually any molded material
- Made in the U.S.A.
- Nontoxic

HEAT CURED & HEAT CURED FDA CERTIFIED FORMULAS

New! NanoCeramicMoldGrease

EXTREME PERFORMANCE LUBRICATING GREASE

How Long Does Your Grease Last?

Lasts 10x Longer Than Conventional Grease!

- Super Low Coefficient of Friction
- Superior Adhesion Properties
- Operating Temperature Range: -40°F to 800°F
- Will Not Soften and Run Out
- Inhibits Corrosion and Rust
- High Load Bearing Properties
- NSF Food Grade Approved
- Viscosity Maintained Over a Wide Temperature Range
- Does Not Contain PTFE or Silicon

Applications: Slides, angle pins, leader pins and bushings, return pins, lifter rods, guided ejection systems, locks, molding machinery, robotic automation, auxiliary equipment and more.
