

SMARTFLOW®

1" Brass Flow Regulator

General Description

The large size of this manual flow regulator is unique in the industry for precise control of 1" cooling water lines. Brass body, valve stem and seat with EPDM o-rings are compatible with most process liquids. The flow regulator can be used in combination with a 1" electronic or mechanical flow meter to add flow, temperature or pressure indication.

Mounting Brackets are included for mechanical support.

Wetted Parts and Materials

Body Brass
 Valve Stem & Seat Brass
 O-Rings EPDM
 Mounting Brackets Powder-Coated Steel
 Connection Size 1"NPT(F)
 Operating Temperature max. 240°F(115°C)
 Operating Pressure max. 150psi(10.3bar)

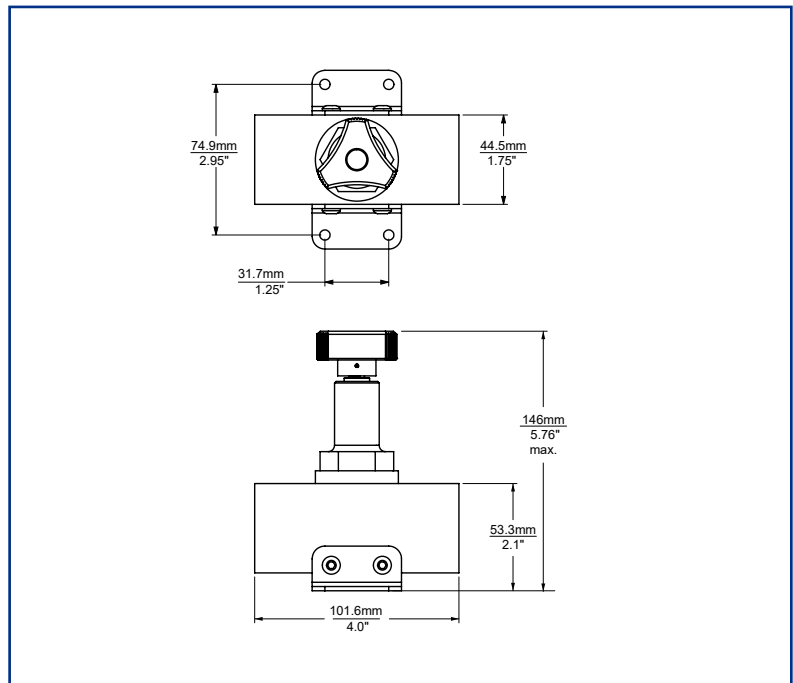

Model Number

FR8-A

**1" Mechanical Flowmeters and Tracer
 Electronic Flowmeters can be attached
 to this flow regulator for added
 functionality.**
