

Defender NO DYE!

All Purpose Rust Preventative

The Defender ND is a semi-dry, dual-purpose rust preventative. Its semi-dry properties allow for longer-lasting protection without causing bleeding through. The acid vapor neutralizer additive protects against PVC, other corrosive materials, and fingerprints. Its clear film provides easy removal before start-up. The film can be molded through on the first few shots. For longer-term protection, apply two coats.

- ✓ Clear Film
- ✓ Moisture Displacing Chemistry
- ✓ Does Not Migrate or Cause Bleed-Through
- ✓ Semi-Dry for Longer Lasting Protection
- ✓ Protects when Molding PVC, Flame-Retardant Resins or Other Corrosive Materials
- ✓ Up to 2-years of Protection Under Normal Storage Conditions
- ✓ Easy Removal
