

Mobile Work Station

PCS Company offers a Mobile Work Station which is a unique and versatile solution for small crowded work spaces. Its tower construction, with built-in electrical outlets, allows users to stack multiple powered devices. The Station has a motorized lift that adjusts the top platform up and down allowing you to work sitting or standing. Its heavy duty casters provide ease of transport for shared use wherever needed. The Mobile Work Station brings together combinations of power equipment in a footprint of only (16"D x 22"L x 43-1/2"H). The only requirement is to be within 6 feet of an electrical outlet for powering up the unit and its multi-plug power strip. The unit comes assembled (except for the middle shelf). The front pivoting kickstand enhances stability for safely managing different pieces of equipment. It is the 3-tier design which provides multiple options for arranging your equipment (no equipment is included). Top and Bottom Platforms, Middle Shelf and Extension Trays have a 1/4" lip to help secure tools:

- Top Work Platform: 14-3/8" square. It features two extension trays that swing out to keep work pieces and other small objects close by when working. Each extension tray is 8" x 4-1/4".
- Middle Shelf: 12-1/4" x 12-5/8". It comes with a removable yoke for mounting a flexible shaft motor. With the yoke removed, the shelf can easily hold micromotors and other equipment.
- Lower Platform: 15-5/8" x 9-3/4" tray for tools and storage.

Features:

- Built in 110v electrical outlets
- Motorized lift
- 2 tier platforms for equipment and accessories
- Weight: 44 lbs.
- Ship Weight: 53 lbs (UPS, FedEx)
- Shipping Dimensions: 20"D x 22-1/4"L x 34-1/2"H
- Footprint (DxL) 16" x 22"
- Power Cable: 6" Long
- Two-Year Limited Warranty
